

Performance Reliability Technology

The Next Generation of Jandy Pumps

Providing superior performance and efficiency while incorporating "Quiet Technology," Jandy's second generation Stealth takes our pumps to the next level. This Stealth boasts an even larger trap basket, making it the largest in the industry. It is designed for easy trouble-free installation and maintenance. Available in single and two speed models, Stealth pumps will easily operate all your pool and spa needs.

QUIET TECHNOLOGY

Jandy's line of Stealth pumps incorporate "Quiet Technology" into every pump. This proprietary design controls the flow dynamics within the pump, resulting in less noise and quiet operation.

LARGE CAPACITY BASKET

Our basket is the largest trap basket in the industry. It fully maximizes the hydraulic flow by holding more debris and is easy to maintain. The Jandy Stealth pump requires less maintenance.

PERFORMANCE

The impeller and diffuser provide the highest performance and efficiency levels. Jandy's proprietary design makes the Stealth the most efficient single speed pump available.

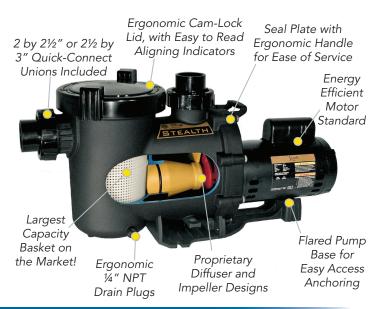

ENERGY EFFICIENT MOTOR

The Stealth pump is powered with an energy efficient motor that saves up to 20% on energy costs. The back plate design makes it easy to maintain and service.

Stealth™ Pumps — Quiet, Powerful, Efficient

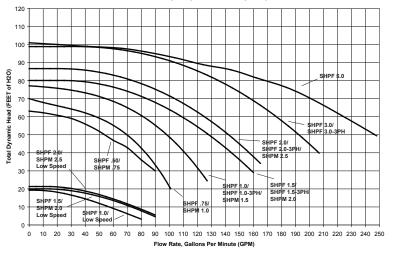

Jandy's premium line of Stealth pumps are quiet, powerful and efficient. They boast the largest basket capacity in the industry. Jandy Stealth pumps give you the high performance power required to drive in-floor cleaning systems, spas, and water features, while being the most efficient single speed pumps available. They are the perfect choice for your pool, spa, or water feature pumping needs.
