

In-Line Circulators

Taco In-Line Circulators are designed to efficiently circulate heated or chilled water in residential or light commercial Hydronic Systems. These circulators may also be used for zoning large installations and are available in bronze construction for domestic hot water applications.

In-Line Circulators demonstrate proven performance, dependability, quiet operation and long lasting performance.

110 Series In-Line Circulators

110 Series (110, 111, 112, 113, 120) Red Baron Circulators:

Rugged Motor Built to Last

- Resilient mounted, split phase motor with built-in overload protector
- Equipped with sleeve bearings for quiet operation

Proven Pump Construction

- One piece non-ferrous impeller
- Stainless steel shaft
- Rugged bronze sleeve bearing
- Two piece carbon/ceramic seal assembly
- Durable one piece spring coupling

Factory Tested

- Every circulator is operated before shipment

Easy, Low-Cost Service

- No special tools required
- Nationwide parts availability

Accessories & Options

- Available in all bronze construction
- Companion Freedom® flanges available in:
3/4", 1", 1-1/4", 1-1/2" sizes
- Freedom® Shut-off flanges available in:
3/4", 1", 1-1/4" and 1-1/2" sizes

Allow easy isolation and service

Specifications (110 Series)

(1) When specifying all bronze construction, add letter "B" after model number (i.e. 110B).

(2) Motors are available with other electrical characteristics – consult your Taco representative.

(3) 240° Intermittent; 200° Continuous.

121-138 In-Line Cartridge Design Pump Series:

Applications

Designed to efficiently circulate heated or chilled water in large residential and commercial Hydronic Systems. Ideal for primary-secondary systems, as well as parallel pumping designs. Available in bronze construction for fresh water service.

Features

Proven Performance: In-Line Cartridge Design Pumps are backed by years of Taco experience in design and manufacture of circulators. Hundreds of thousands are in service.

Dependable, Quiet Operation:

In-Line Cartridge Design Pumps offer quiet dependable pumping power and long lasting performance. Ideal for heating and/or air conditioning systems requiring high head performance, pressure boosting, and recirculation systems with relatively low volume.

Unique Cartridge Design:

Replaceable “cooler running” bearing cartridge extends bearing life. With permanently sealed grease lubricated ball bearings it is virtually maintenance free.

Built to Last

Cartridge Bearing Assembly

Cartridge design isolates the bearings from the effects of system fluid temperatures which greatly extends bearing life

- Alloy steel shaft
- Cupro-Nickel shaft sleeve

Mechanical Seal

- Two piece carbon/ceramic seal is standard
- Sealide-C/viton available for high temperature and aggressive water applications

Body & Flanges

- Available in cast iron or bronze
- In-Line configuration
- Companion flanges provided in 2-1/2” or 3”

Impeller

- Dynamically and hydraulically balanced
- Enclosed type – cast iron or bronze

Drive Coupling

- Rugged flexible rubber construction absorbs angular and parallel misalignment

Rugged Motor

- Available in single and three phase, and all standard voltages . . . open-drip proof enclosure
- Equipped with sleeve bearings for quiet operation
- Resilient mounted
- Built-in overload protector on single phase models

Factory Tested

- Every pump is built to Hydraulic Institute standards and operated before shipment

Easy Low-Cost Service

- No special tools required
- One cartridge bearing assembly fits all models – replace cartridge only . . . not bracket
- One mechanical seal fits all models
