

BIBLIOGRAPHY

BIBLIOGRAPHY

1. Hydraulic Institute Engineering Data Book & Standards Book, Cleveland, Ohio, 1979.
2. Goulds Pump Manual, Seneca Falls, New York, 1972.
3. The Chemical Engineering Guide to Pumps, Ed. by K. McNaughton, McGraw-Hill Publications Co., New York, 1984.
4. Durco Pump Engineering Manual, The Duriron Co., 1960.
5. Principles of Unit Operations, A. Foust, L.A. Wenzel, C.W. Clump, L. Maus, L.B. Anderson, John Wiley & Sons, New York, 1960.
6. The Piping Handbook, edit. Reno C. King, 5th Edition, McGraw Hill, New York, NY 1973.
7. Slurry Transport Using Centrifugal Pumps, K.C. Wilson, G.R. Addie, R. Clift, Elsevier Science Publishers Ltd., Crown House, Linton Road, Barking, Essex IG11 8JU, England.
8. Cameron Hydraulic Data, Ed. by C.R. Westaway & A.W. Loomis, 16th edition, Ingersoll-Rand, Woodcliff, New Jersey, NJ 07675.
9. Some Pipe Characteristics of Engineering Interest, L.F. Moody, Houille Blanche, June 1950.
10. Turbulent Flow in Pipes with Particular Reference to the Transition Region between the Smooth and Rough Pipe Laws, C.F. Colebrook, J. Inst. Civil Engrs. ,(London), February 1959.
11. Fluid Mechanics with Engineering Applications, R.L. Daugherty & J.B. Franzini, 7th edition, McGraw-Hill Book Company, New York, NY.
12. Esso Product Information, Lubricants and Specialties, 1990.
13. Van Nostrand Reinhold Encyclopedia of Chemistry, ed. D.M. Considine, 4th edition. Van Nostrand Reinhold Company, 1984, New York.
14. Chemical Engineering, William B. Hooper, August 1981.
15. Centrifugal and Axial Flow pumps, A.J. Stepanoff, 2nd edition, John Wiley Sons, New York, 1957.
16. The Pump Handbook, Igor J. Karassik, William C. Krutzsch, Warren H. Fraser and Joseph P. Messina, 2nd Edition, McGraw-Hill, New York 1986
